**DIVISION OF
OIL, GAS & MINING**

Dear Ms. Linner:

We have reviewed the Permit Application Additions from Glenwal Coal Company, Crandall Canyon Mine, ACT/015/032. A small sediment pond was proposed, with a total capacity of less than one acre-foot. The stability of the embankment appears to be satisfactory with the exception of the steep natural slope as discussed in the list of incomplete items in the introductory portion of the application.

If the applicant has not already done so, he should submit a Form R-69, Application to Construct a Dam Impounding Less than 20 Acre-feet, (copy enclosed) to the State Engineer. The applicant is invited to work with Mark Page, the Area Engineer in Price, to complete and file the application.

Thank you for your cooperation.

Sincerely,

A handwritten signature in dark ink, appearing to read "Richard B. Hall".

Richard B. Hall, P.E.
Directing Dam Safety Engineer

RBH/cp

cc: Mark Page, Price Area Engineer

INSTRUCTIONS FOR
APPLICATION TO CONSTRUCT
A DAM IMPOUNDING LESS
THAN 20 ACRE-FEET

Section 73-5-12 of the Utah Code Annotated 1953, as amended, requires persons proposing to construct reservoirs, which have the capability of holding less than 20 acre-feet, to provide the State Engineer with pertinent data on the proposed dam and reservoir. The accompanying "Application to Construct a Dam Impounding Less Than 20 Acre-Feet" lists the information required.

In reviewing the application, the State Engineer will make a determination as to the proposal's potential to cause significant property damage or loss of human life in the event of a failure. If the potential for loss of human life or significant property damage exists, the State Engineer may require plans and specifications be submitted pursuant to Section 73-5-5 of the Utah Code Annotated 1953 as amended.

If the proposed reservoir and dam will alter a natural stream, the State Engineer may require the applicant to file an "Application to Alter a Natural Stream" pursuant to Section 73-3-29 of the Utah Code Annotated 1953 as amended.

Before approval of the accompanying application can be given, it is mandatory that the water rights for the proposed structure are in order. Reservoirs used to store irrigation water, stock ponds, and ponds used for recreation including aquatic habitat must have a water right to satisfy the uses and/or the increased evaporation. New diversion dams will normally require a new water right or a change in point of diversion of an existing right. Regulating reservoirs must meet the following criteria if they are to use an existing water right:

1. The reservoir must be on an off-stream site.
2. The inflow into the reservoir must not exceed the flow rate of the water right.
3. The reservoir capacity shall not be greater than the water right will supply in forty-eight (48) hours.

It is important that in identifying the water right involved that it be referenced by a number on record in the State Engineer's office. This number may be a Diligence Claim Number, an Underground Water Claim Number, an Approved Application Number, a Certificate Number, a Water Users Claim Number, or a Case Number and Title of Decree in a District Court. If it is proposed to build a regulating reservoir based on ownership of stock in a water company, it will be necessary to attach a letter from the water company involved, stating they have no objection to construction of the regulating reservoir, and referencing the stock owned by the applicant.

It is imperative the accompanying form be complete and accurate. If assistance is needed to complete the form, contact the Utah Division of Water Rights at (801) 533-6071.

**APPLICATION TO CONSTRUCT
A DAM IMPOUNDING LESS
THAN 20 ACRE-FEET**

STATE OF UTAH

Application No. _____
Received _____
Entered _____

The following application is submitted, pursuant to Section 73-5-12 of the Utah Code Annotated 1953, to obtain the authority to build a dam which will create a reservoir impounding less than 20 acre-feet

1. APPLICANT INFORMATION

NAME _____
ADDRESS _____
CITY _____ COUNTY _____
STATE _____ ZIP _____

2. PURPOSE OF DAM

STOCK POND _____ REGULATING RES. _____ DIVERSION DAM _____
IRRIGATION _____ DEBRIS BASIN _____ FLOOD CONTROL _____
SEDIMENTATION _____ TAILINGS POND _____ RECREATION _____
OTHER (describe) _____

3. LOCATION OF DAM

QUARTER/QUARTER (i.e. NESW) _____ SECTION _____
TOWNSHIP _____ RANGE _____ BASE & MERIDIAN _____

4. PROPOSED DAM

DAM HEIGHT (vertical distance) _____ FEET
CREST LENGTH (length of top of dam) _____ FEET
CREST WIDTH (width of top of dam) _____ FEET
UPSTREAM SLOPE _____ VERTICAL ON _____ HORIZONTAL
DOWNSTREAM SLOPE _____ VERTICAL ON _____ HORIZONTAL
WATER SURFACE AREA AT SPILLWAY CREST _____ ACRES
RESERVOIR CAPACITY AT SPILLWAY CREST _____ AC.FT.
TYPE OF DAM (i.e. earthfill, concrete, etc.,) _____

5. PROPOSED OUTLET

INSIDE DIAMETER _____ INCHES LENGTH _____ FEET
TYPE OF PIPE (i.e. concrete, steel, etc.,) _____
TYPE OF GATE OR VALVE _____
LOCATION OF GATE (upstream, downstream, center, etc.,) _____

(OVER)

6. PROPOSED SPILLWAY

CREST LENGTH (width of bottom of spillway) _____ FEET
DEPTH (from bottom of spillway to top of dam) _____ FEET
TYPE (i.e. earth channel, pipe, etc.,) _____
CONTROL (i.e. gates, flashboards, etc.,) _____

7. WATER RIGHTS

DESCRIBE (See Instructions) _____

8. COMMENTS

9. PLANS

Attach any plans sketches or diagrams which will clarify the information given on this application.

The undersigned acknowledge they have read the instructions included with this application, and are aware no construction is to begin until this application has been approved by the Utah State Engineer
